

With AcornVac, condensate from refrigerated cases and walk-in coolers is conveniently routed up and out through previously unused ceiling space.

***“The AcornVac vacuum plumbing system helped [Amazon] achieve their mission because it’s a non-invasive product. You can install it in any location [and] you don’t have to rip up floors, so [Amazon] is able to move merchandise through many other areas without extensive plumbing.”***

*- Ray Kelly, Manager,

## **SIMPLE RENOVATION. STREAMLINED INNOVATION.**

AcornVac® simplifies renovation projects like the Amazon Fulfillment Center by eliminating floor cutting, digging and disruption to add drainage.

### **The AcornVac vacuum plumbing system:**

- Conveniently re-routes wastewater piping overhead
- Eliminates costly floor cutting
- Simplifies facility design and maintenance
- Reduces project timelines
- Stops mainline clogs and leaks
- Saves time and money
