

AcornVac Vacuum Grease Drainage System

Vacuum Grease Waste Drainage System Overview

- ✓ Replaces point-of-use grease interceptors with under-slab or above grade Vacuum Grease Accumulators
- ✓ Routes grease waste from the Vacuum Grease Accumulator to Vacuum Center grease waste collection tanks through a separate overhead piping network
- ✓ Discharges the grease waste to a local or external grease waste interceptor

Benefits

- ✓ Eliminates point of use grease interceptors from sales floor and odors associated with regular maintenance and cleaning
- ✓ Eliminates point of use grease interceptor maintenance costs
- ✓ Relocates grease waste piping from problematic underground locations to easily accessible overhead spaces
- ✓ Minimizes waste line build up and maintenance costs associated with locating and clearing underground grease waste line blockages
